

MEET DR. JENNIFER SPERRY, PETS PLUS US VETERINARY ADVISOR

There are many things that make Pets Plus Us a unique and innovative pet insurance company, one of them being our more than 70-years of combined pet insurance industry experience. While we've always had veterinary medical professionals as part of our team, we're happy to announce that veterinarian, Dr. Jennifer Sperry, BSc, DVM has recently joined our growing pack! Dr. Sperry is a graduate of Ontario Veterinary College and practiced small animal medicine for the past 11-years in general and emergency practice. Checkups, consultations, medicine, surgery, emergencies and client counselling are what kept her busy and inspired throughout this time.

What is your favourite pet movie?

"The Adventures of Milo and Otis".

Do you own any pets?

"I have two dogs: Pippy, who is a 16-year-old "little brown dog", and Sprite, who is a 12-year-old chihuahua. I adopted Pippy when I was first accepted to vet school, and Sprite when I graduated. Pippy was a faithful study-buddy, and therefore holds an honorary DVM. Sprite is the head of security. Both dogs have a delightful array of health conditions, as you would expect from dogs belonging to a veterinarian."

What do you do for fun?

"I like to travel, hike, go camping with my family and garden."

Dr. Sperry is committed to providing veterinary excellence in helping our team members, partners and members create long lasting, happy and healthy memories with our four-legged furry family members. Please join us in welcoming her to the team.
